Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. The amendment filed on 12 June 2003 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the last lines of claims 1 and 12, reference to "the top surface of the gate electrode" (emphasis added) is indefinite, in that claims 1 and 12 each include at least two transistors, each transistor recited as including "a gate electrode." Without more description of the gate electrode recited in the last lines of these claims, a reader cannot discern which of the previously introduced gate electrodes applicant is referring to in the last lines of claims 1 and 12.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2826

Claims 1-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. An invention that combines the limitations of claims 1 and 12, as originally written, with the limitation that "the interconnect layer having a top surface which is lower than a top surface of the gate electrode," is not disclosed in the original application.

It is noted that the limitation, "having a top surface which is lower than a top surface of the gate electrode," is a negative limitation, that is to say, it requires the invention to not be something it could have been (i.e. the interconnect layer could have had a top surface formed at any level) without additional limitations, as opposed to positively requiring the invention to be something it was not, without additional limitations.

To support a negative limitation, the original disclosure must go beyond merely stating that the invention may be practiced within the constraints of the negative limitation. For support, there must be a clear statement that the invention cannot be practiced outside of said constraints.

For this reason one must look to the original application for a clear statement by Applicant that the invention cannot be practiced when the top surface of the interconnect layer is higher than a top surface of a gate layer. Applicant has made no such statement. To the contrary, Applicant has clearly stated that in at least one embodiment, the

Art Unit: 2826

top surface of the interconnect layer should be higher (not lower, as the amended claims require) than a top surface of a gate layer. Note figure 10 and page 29 line 4 of the application.

Response to Arguments

4. Applicant's arguments with respect to claims 1-22 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
